Duralam 6mm & 3mm Compact Laminate Wall Panelling

The DuraLam Wall Panelling system has a proven track record of delivering excellence every time. DuraPlan uses 3mm and 6mm compact laminate board, which is an innovative and durable panel made from thermosetting resins, homogeneously reinforced with cellulose fibres and is manufactured under high pressure and temperature. As a consequence, these panels are strong, self-supporting, moisture resistant and durable.

| How does Duralam Wall Panelling perform?

The DuraLam Panels are beautiful in appearance and can take rough treatment. When durability and functionality are a premium, there's no better selection and the range that is backed with a 10 year warranty. The excellent mechanical and physical properties of the DuraLam Panels makes it ideal for use in all public and leisure facilities and for anywhere that's requiring long term, easy to clean and durable linings.

A self-supporting panel that can be used with minimal structural support, providing a clean, uninterrupted, and cost effective option. The DuraLam Panels have a high resistance to organic solvents such as acetone, toluene, xylene and similar substances. The panels are also resistant to disinfectants and cleaning chemicals as well as food juices and dyes, which affect neither the properties nor the appearance.
