### PRODUCTS

| Durasafe Lockers  
| Duraline

Home to two high rise towers in downtown Auckland, 205 Queen Street's EOT Facility has been upgraded to a lively and attractive space with premium facilities. Duraplan Systems Ltd enjoyed watching this space come to life & were pleased to be involved in the fitout and completion of the End of Trip Facility! Working alongside Cachet Group, the Duraplan team supplied & installed the Cubicle Partitioning in our full height Altitude Range & completed the fitout for the Lockers and Bench Seating in our Durasafe and Duraline Ranges. In this end-of-trip, there has been a newly refurbished shower and bathroom facility which incorporates soft curved joinery, timber cubicle partitions and back-lit mirrors that allow the space to impersonate a large shared space despite the small floorplate.
